

# **UPDATE ON WATER PRESSURE PROBLEMS AT WITSAND: 06 JULY 2021**

We're still experiencing low water pressure readings at our water reticulation junction feeding the higher elevations of Witsand, causing the properties in that vicinity to have little to no water. We apologise for the inconvenience and will make every effort to restore the water supply as soon as possible. Two water trucks will circulate throughout the day to supply purified water where needed. Kindly contact Jenovaan Booysen at 073 494 2526 or Christopher September at 084 836 1108 should you require further information or clarity.
